Biology

Biology is defined as the science of life or biology, and it is the science that searches for the characteristics that distinguish humans, animals, and plants from inanimate objects, such as nutrition, growth, reproduction, etc. [1] The concept of biology (in English: Biology) was derived from two Greek words: (bios); It means life, and (logos). It means science or study, and it is a science that studies the cellular structure of all life forms. Simple ones, such as bacteria that consist of one cell, and the complex that consists of several cells. It is also concerned with studying the classification of living organisms, their behavior, and their evolution.

Maths

This course aims to teach students in all fields of mathematics for all educational stages and there will be a noticeable change after completing all stages of the course in this subject and making them deal with mathematics in an easier, simpler and fun way at the same time

Chemistry

The science of chemistry is one of the most important and most famous scientific academic disciplines around the world, as it is concerned with studying all chemical aspects and understanding all interactions between materials in their different forms . The science of chemistry is an ancient science without a doubt that emerged with ancient civilizations, and developed by Arab scientists and then the European Renaissance, so that it has reached its peak of prosperity at the present time . The science of chemistry is now closely linked to a lot of other sciences, especially the pharmaceutical, pharmaceutical, botanica sciences and others ... and the backbone of all modern industries is considered without exception .

School Excellencel

community is driven by a shared purpose: to make a better world through education, research, and innovation. We are fun and quirky, elite but not elitist, inventive and artistic, obsessed with numbers, and welcoming to talented people regardless of where they come from. Founded to accelerate the nation's industrial revolution, School Excellence is profoundly Saudi. With ingenuity and drive, our graduates have invented fundamental technologies, launched new industries, and created millions of Saudi jobs. At the same time, and without the slightest sense of contradiction, my school is profoundly global. Our community gains tremendous strength as a magnet for talent from around the world. Through teaching, research, and innovation, my school exceptional community pursues its mission of service to the nation and the world.

Mission

The mission of my school is to advance knowledge and educate students in science, technology, and other areas of scholarship that will best serve the nation and the world in the 21st century. The Institute is committed to generating, disseminating, and preserving knowledge, and to working with others to bring this knowledge to bear on the world's great challenges; my school is dedicated to providing its students with an education that combines rigorous academic study and the excitement of discovery with the support and intellectual stimulation of a diverse campus community. We seek to develop in each member of the School Excellence community the ability and passion to work wisely, creatively, and effectively for the betterment of humankind.

A screenshot of a Windows File Explorer window. The address bar shows the path 'C:\Users\K.S.M\Desktop\projectai'. The main pane displays a list of files and folders. The selected item is 'AboutSchool'. The list includes folders like 'css', 'images', 'Project 2', and 'projectai', as well as files like 'name', 'index', 'feedback', 'Courses', 'Contact', and 'AboutSchool'. The sidebar on the right shows navigation options like 'هذا الكمبيوتر الشخصي' and 'الشبكة'. The top of the window shows the Windows taskbar with the Start button and several open applications.
